

.files

These are my personal dotfiles of my main PC and all my other devices. You probably shouldn't use these, as the configs are **very** specific to my PC usage.

Features

- System-wide dark color scheme (e.g. Vim, DWM, ST, qutebrowser, Spotify, notifications, ...)
- System-wide Vim-key navigation
- Automatic environment setup on boot (personal preference)
- Simple and efficient backup and sync scripts
- Scripts for faster bootstrapping of projects and better development experience

Screenshots

qutebrowser and Neovim

Spotify and Zathura

My routine for new machines

1. Clone this repository into any directory
2. Execute `./sync`
3. Repeat step 2 every once in a while
